

Webex Lifecycle Automation & Governance Platform

Provisioning, lifecycle management, policy enforcement, licensing, and migrations across Cisco Unified Communications Manager (CUCM) and Webex collaboration environments often rely on fragmented tools, manual processes, and inconsistent controls, creating operational drag, risk, and costly rework. Akkadian replaces that complexity with a **centralized automation and orchestration layer connecting CUCM, Webex, and enterprise systems** including, but not limited to, ServiceNow, Active Directory, Microsoft Entra ID, HR systems, emergency response platforms, and healthcare applications.

From **Advanced Migrate for Webex** and zero-touch provisioning to license management, lifecycle orchestration, and policy enforcement, Akkadian automates every move, add, change, and delete through a unified governance platform that **reduces risk, eliminates manual effort, and delivers proven ROI**.

Trusted by leading enterprises, healthcare systems, and government agencies, Akkadian enables governed, secure, and scalable workflows across **commercial, regulated, and hybrid Cisco collaboration environments**.

HOW CAN AKKADIAN IMPACT YOUR BUSINESS?

 Automated User Lifecycle Management	 Advanced Migrate for Webex
 No-Code Zero-Touch Provisioning	 License & Policy Management
 Custom Workflow Orchestration	 Role-Based Access Control (RBAC)
 Self-Service Administration	 Audit & Compliance Reporting

Key Capabilities

Automated Lifecycle & License Management

Automate Webex on and offboarding, transfers, and MACDs. Standardize workflows and assign numbers, devices, policies and more through one governed process.

Advanced Migrate for Webex

Assess readiness, plan phased CUCM-to-Webex Calling migrations, validate before execution, and track every outcome with rollback and recovery support.

No-Code Zero-Touch Provisioning

Native integrations with Active Directory, Microsoft Entra ID, ServiceNow, and other systems trigger governed provisioning workflows without manual handoffs.

RBAC Security & Compliance

Role-based access control, workflow governance, audit visibility, approvals, and reporting help organizations maintain control across regulated environments.

Policy & Self Service-Driven Governance

Enable employees, help desks, and delegated administrators to manage approved Webex services within the policies and permissions established by IT.

Third Party Integration

Connect to ecosystem platforms such as ITSM, identity, HR, HCM, ERP, EHR, emergency response, call accounting, and clinical communications systems through native integrations and RESTful APIs.

Webex & Cisco Ecosystem Support

- Webex Calling, Meetings, Messaging, and Contact Center
- Webex Control Hub
- CUCM
- Cisco Unity Connection
- Commercial, regulated, and hybrid Cisco environments

Why Webex Customers Choose Akkadian

Akkadian provides a unified governance and automation platform for the complete Webex lifecycle, from migration readiness and execution through provisioning, licensing, policy enforcement, and ongoing user management, including the collaboration ecosystem. **Akkadian helps organizations reduce manual effort, improve migration outcomes, strengthen governance, and operate Webex more efficiently at scale.**
